

## Public Utilities Commission for the Municipality of Chatham-Kent

### Class Environmental Assessment for the Proposed Installation of Sanitary Sewers and Wastewater Treatment for the Community of Bothwell

#### NOTICE OF PUBLIC INFORMATION CENTRE #2

##### The Study

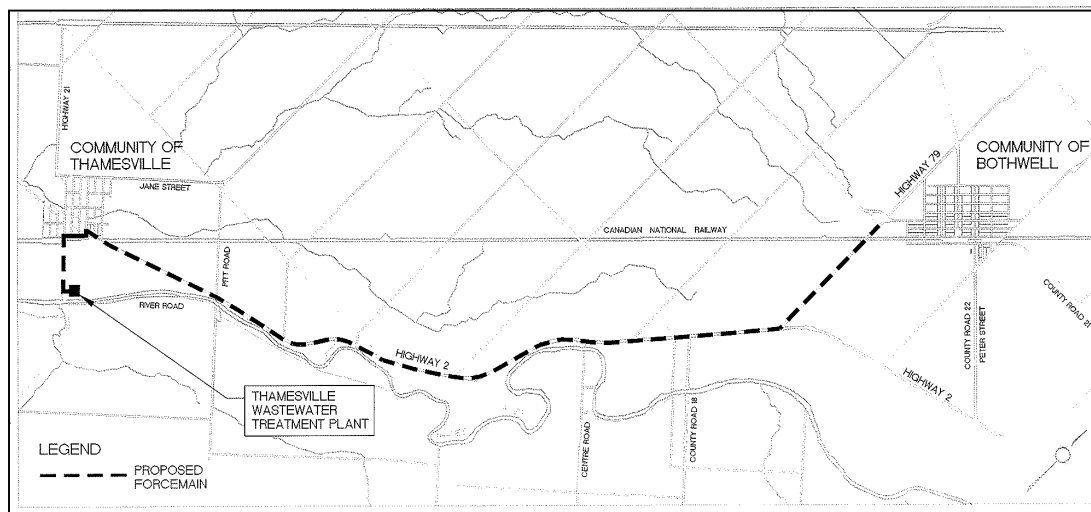

The Chatham-Kent Public Utilities Commission (PUC), through their consultants, Earth Tech Canada Inc., is currently completing a Class Environmental Assessment (Class EA) study for the proposed installation of sanitary sewers and provision of wastewater treatment to serve the Community of Bothwell.

##### The Process

The Class EA Study is being conducted in accordance with the approved requirements of a Schedule "C" project as defined in the Municipal Engineers Association Class EA document (2000). The Class EA process includes public and review agency consultation, an evaluation of alternatives, an assessment of the impacts of the proposed improvements, and identification of measures to mitigate any adverse impacts. Public Information Centre #2 will satisfy one of the public contact requirements of the Class EA planning process.

##### Recommended Wastewater Servicing Strategy

At this time, the recommended wastewater servicing strategy includes installing a new sewage collection system to service the community of Bothwell. This involves the siting/construction of local sewers, forcemain and pumping stations that will direct wastewater flows from Bothwell to the existing Thamesville wastewater treatment plant (see map). The existing Thamesville wastewater treatment plant has sufficient capacity to treat the additional flows from Bothwell, however, some process upgrades (all on site) will be required to bring the 25-year-old facility up to current standards that will in turn significantly improve wastewater treatment plant effluent quality.

##### Public Information Centre #2

Public Information Centre # 2 will allow for review of design concepts including evaluation of forcemain routes and sewage pumping station alternatives. Project implementation including estimated project cost and schedule will also be presented. Public Information Centre #2 will be organized as an informal presentation of display boards with members from the project team available to answer questions beginning at 6:00 pm. Public Information Centre #2 is to be held:

**Date:** Wednesday, February 16<sup>th</sup>, 2005  
**Location:** Zone Township Central Public  
School Gymnasium  
735 Main Street  
Bothwell, Ontario  
**Time:** 6:00 pm to 8:00 pm  
**Presentation:** 7:00 pm to 7:45 pm

### Comments

You are encouraged to attend Public Information Centre # 2 and provide your comments so that they may be included in the study. Comments received through the course of the Study will be considered in identifying the preferred wastewater treatment strategy. With the exception of personal information, all comments will become part of the public record.

Upon completion, an Environmental Study Report (ESR) will be prepared to document the planning process followed, including conclusions, and recommendations in addition to how public input was received and considered. The report will be available at various locations for public review and comment. Similar notification will be provided at the appropriate time. Please contact either of the following if you wish to be added to the mailing list, have any questions or wish to obtain more information on the project:
