

WALLACEBURG SANITARY SEWER REHABILITATION

The Chatham-Kent PUC has retained Dillon Consulting Limited to proceed with design and implementation of sewer rehabilitation works within the Community of Wallaceburg. The works include conventional excavation and installation for the repair of sewers and maintenance-hole replacement. It will also include trenchless technologies, also known as no-dig operations. The majority of the works performed will have minimal disruption to localized areas in the Community. We ask you to have patience as these tasks will be ongoing from June and expected to continue until August 2010.

The streets that will be affected consist of:

Street	From	To
Highbury Crescent (North End)	West Leg	East Leg
Lillian Street	Cecile Avenue	End of Crescent
Margaret Avenue	Napier Street	East of Dundas
Nelson Street	Wall Street	Elgin Street
Duncan Street	James Street	Sydenham River
Elizabeth Street	Camp Street	William Street
Wellington Street	Camp Street	Creek Street
Poat Street	<i>All of Poat Street</i>	
Wall Street	William Street	University Avenue
Brander Avenue	University Avenue	Lorne Avenue
Lorne Avenue	Elgin Street	Wall Street
Selkirk Street	Jeanne Street	Brander Avenue
Forhan Street	Jeanne Street	Running Creek

Every effort will be made to minimize inconvenience to the public. Disruption in your local area will be reduced through the use of trenchless techniques.

If you have any concerns or questions about this project please do not hesitate to call either of the following two project contacts:
